

Are you **ready**
for a great

Escape?

Kleeman & Associates presents:

Hitachi Data Systems' 5700E Intelligent Storage System

Built
for great Escapes

Even though the 5700E boasts a Mean Time to Data Loss longer than the average lifespan, it's also built for great escapes from system crashes, disk failure, and hardware malfunction.

One of the safest places on earth for your data.

- RAID architecture
- Automatic recovery through RAID 1 or 5
- Hot-spare option
- Duplexed control storage
- Redundant DC power supplies
- Redundant fans
- Hot-pluggable components
- Maximum-uptime design
- Cache reliability features
 - ECC protected for high reliability
 - Battery protected
 - Duplexed cache—all writes duplicated
 - Mirrored writes.

New software utilities give you more reasons to relax.

- Full, automated recovery of application services
- Fast recovery following a system crash or reboot
- Data protected against loss and corruption caused by disk failure and hardware malfunction
- Automatic recovery from server-to-RAID connection failures.

Bring us your toughest demands—the 5700E will meet them.

- Single product family fulfills customer needs
- Flexible packaging—four frames to choose from
- Scalable capacity and host interface
- Network-oriented management interface (SNMP)
- Hitachi quality and reliability
- Ease of use and configuration with common user interface for all hosts
- Unique control console software designed for Help Desk, network administrators, and end users
- Centralized network management with maximum uptime.

5700E features give new meaning to supercharged performance.

- High-performance design
- Advanced cache algorithms
- RAID striping algorithms
- High-performance SCSI adapters
- Concurrent data access
- High bandwidth
- Dual controller design
- Cache performance features.

Return this card for more information on the HDS 5700E Intelligent Storage System.

- More information
- Storage-needs assessment
- Qualify for a 30-day evaluation system
